

INDIANA UNIVERSITY

DEPARTMENT OF PSYCHIATRY

School of Medicine

January 29, 2013

The **Adolescent Dual Diagnosis Clinic (ADDC)** at the **Riley Hospital for Children** in Indianapolis is expanding our services to provide treatment (via telemedicine) to adolescents (10-18 years old) in under-served areas of Indiana. The clinic, which is sponsored by the Indiana Division of Mental Health and Addiction, utilizes a treatment intervention that offers individualized, outpatient mental health and substance abuse treatment to adolescents with co-occurring psychiatric and substance use disorders. The intervention, the ENCOMPASS program, is an evidence-based treatment which integrates individual cognitive behavior therapy, family therapy, medication treatment, and a contingency management program to reduce drug use and improve overall functioning.

Adolescents at the sites listed below will be able to receive ongoing treatment from our therapists and physicians here at Riley Hospital in Indianapolis using a computer connection. The initial evaluation will take place in Indianapolis, but the rest of the 16-week program will be completed at the respective clinical sites.

The Greensburg site is located at Decatur County Memorial Hospital (DCMH; 720 N. Lincoln St., Greensburg, IN 47240). Our counterparts in the DCMH clinic can be reached at 812-663-1163.

The Evansville site is located at the Deaconess Riley Children's Specialty Center located at 4133 Gateway Blvd, Suite 220, Newburgh, IN 47630. Our counterparts in the Deaconess clinic can be reached at 812-858-3131.

Intake appointments must all take place at Riley and can be set up by calling (317) 944-8162.

COMING SPRING 2013

We anticipate that the program will be launched at two additional locations in 2013:

Oaklawn Psychiatric Center (415 E. Madison St., South Bend, IN 46617; 574-283-1234).

IU Health White Memorial Hospital (720 South 6th St., Monticello, IN 47960; 574-583-1779).
